

# Oasts at Quinces, Tunbridge Lane, Bramshott

## Listed Grade II

*Oasts and barns, now a large house. Late C18, mainly mid C19, house part C20. Walls of sandstone, brickwork in English and Flemish bonds, with boarding to upper walls. Tile roof, steep pyramid and cone to the oasts, hipped and half-hipped elsewhere. An irregular group, the core being a square oast attached to a rectangular barn, and a circular oast with outshot, a lower later range, with house touching the south side. Casements and boarded doors*

Quinces (or Quints) was a farm whose land stretched eastwards to the Woolmer Lane. The small farmhouse was incorporated into the present (for now) Quinces house; other farm buildings are gone.

The oasts were used for kilning hops (for brewing): Quints is shown on the Tithe Map as having two of its fields called 'Garden Field' - possibly a reference
